

Foundations of Cyber Security

MERN Security Demo CRM

Demonstrates security practices in a CRM context

OWASP Top 10 Attacks & Defenses

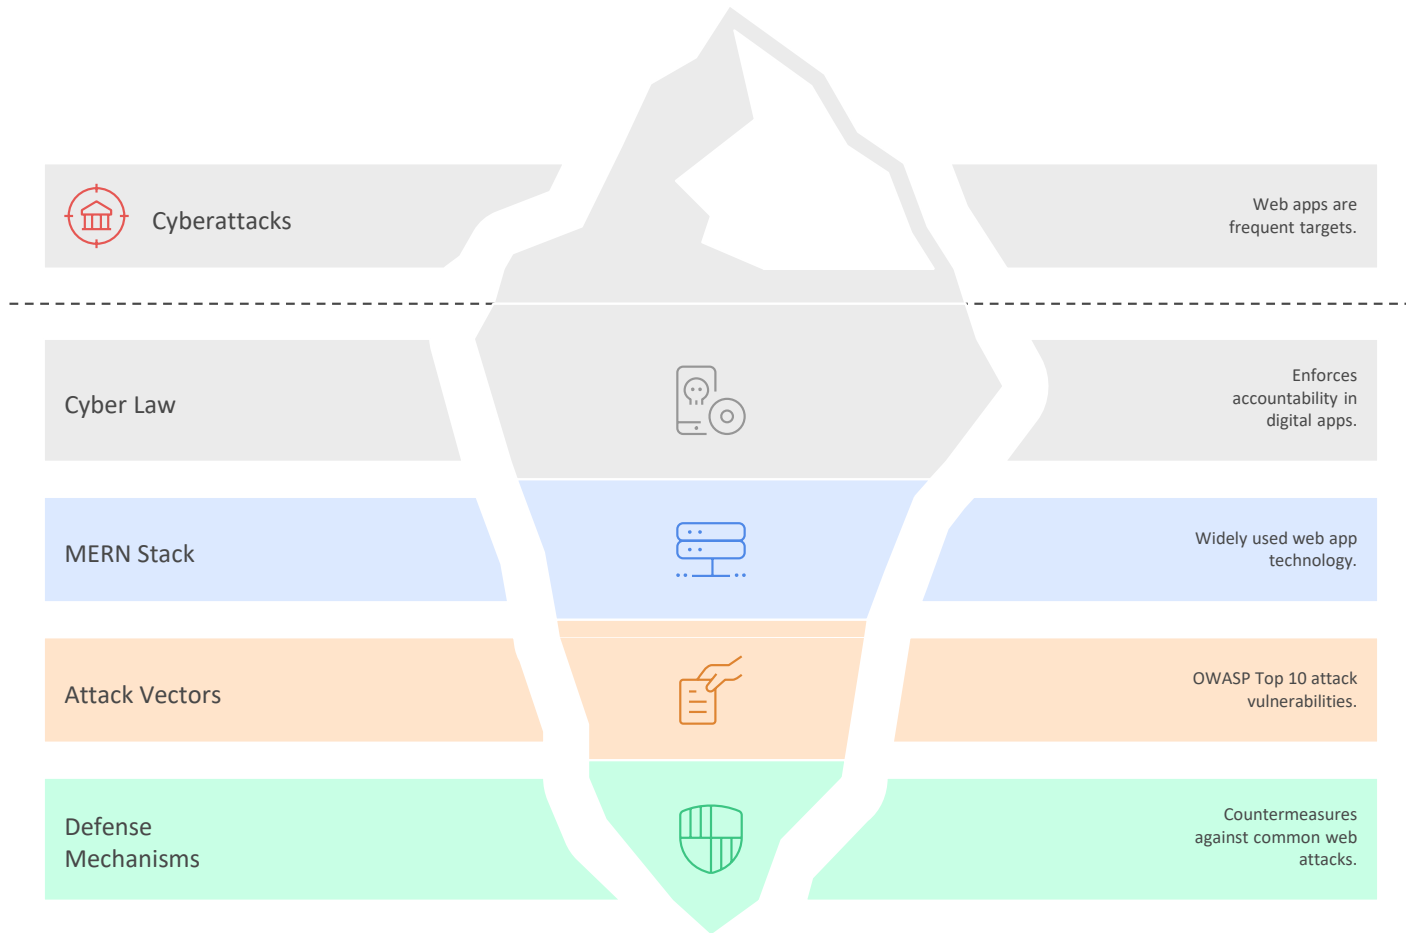

Highlights common web vulnerabilities and their solutions

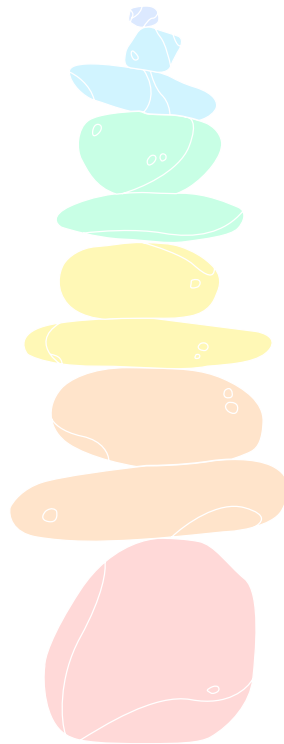

Cybersecurity Awareness for Developers

Educates developers on security best practices

Web app security is more than meets the eye.

OWASP Top 10 Web Application Security Risks

Server-Side Request Forgery

Attacker makes requests on server's behalf

Logging/Monitoring Failures

Lack of visibility into attacks

Integrity Failures

Untrusted data leads to code execution

Authentication Failures

Bypassing login and session management

Outdated Components

Exploitable vulnerabilities in old software

Security Misconfiguration

Improperly configured security settings

Insecure Design

Flaws in application architecture

Injection Flaws

Malicious code execution by attacker

Cryptographic Failures

Sensitive data exposure in transit

Broken Access Control

Unauthorized data access and modification
